RFgen[®]

REDUCE COST | MAXIMIZE PRODUCTIVITY | IMPROVE ACCURACY | INCREASE EFFICIENCY

INVENTORY MANAGEMENT. FAST. ACCURATE. EFFICIENT.

RFgen Mobile Foundations for Deltek Costpoint provides a Deltek-validated suite of wireless barcoding and mobile applications for inventory management, purchase order processing, and manufacturing that supports real-time communication with your Costpoint system.

GO PAPERLESS

Get rid of costly, error-prone manual, paper-based processes with barcoding and RFgen mobile applications that enable instant, reliable updates to your Costpoint system.

INCREASE WORKER PRODUCTIVITY

Streamline operational processes like picking, packing, receiving and transfers to be more efficient and intuitive on a mobile or barcode scanning device.

MOBILIZE REMOTE/FIELD OPERATIONS

RFgen supports wireless and offline mobile data collection. Collect data in the field, then automatically update Costpoint when reconnected.

"We had projected to hit ROI in eight months, and we did it in six months. That's how efficient we became using RFgen. I'm a big advocate of RFgen."

PEACE OF MIND WITH VALIDATED INTEGRATION WITH DELTEK COSTPOINT

Whether you want to implement wireless barcode scanning, support off-network workflows or automate your warehouse operations, RFgen Mobile Foundations for Deltek Costpoint delivers:

- **Validated Connectivity to Costpoint**—Data collected by RFgen is validated against business data residing in Costpoint and transactions are executed using Costpoint web services.
- **Seamless Integration**—All RFgen pre-built mobile applications, or any new applications you develop, automatically use the validated integration for real-time (or offline batch) updates to your Costpoint system.

GET A HEAD START WITH PRE-BUILT MOBILE APPS

RFgen Mobile Foundations for Deltek Costpoint provides you with a suite of pre-built mobile applications that seamlessly integrate with Costpoint to handle the most common inventory management workflows.

Different from a rigid warehouse management system (WMS), mobile applications can be customized, tested and rolled out in phases, one transaction at a time, allowing you to control the impact to your business.

MOBILE APPLICATION CUSTOMIZATION THE EASY WAY

When you purchase RFgen, you receive the source code for the pre-built suite of mobile applications. You can request RFgen Professional Services or use the RFgen Mobile Development Studio yourself to modify or create mobile applications using a drag-n-drop interface; developers get a .NET based scripting environment for code-level control. Applications are written once and can be deployed across multiple device platforms, including Windows Mobile, Windows CE, Apple iOS and Android.

RFGEN SOFTWARE—YOUR TOTAL SOLUTION PROVIDER

RFgen Software helps organizations reduce supply chain implementation costs and increase accuracy and efficiency with the industry's most reliable, flexible mobile data collection and barcode software solutions. In business since 1983, RFgen is known in the supply chain industry for its solid, high-quality products and high customer satisfaction ratings. With a global reach and local touch, RFgen and its global network of certified solution partners can support your organization anywhere in the world. Not only does RFgen provide robust mobile supply chain software, we also offer a complete end-to-end mobile data collection solution, including:

Mobile device hardware for your data collection needs

As your one-stop-shop, RFgen can provide you with the mobile device hardware you need to automate your warehouse. RFgen is a certified reseller of mobile computing devices for all major hardware brands. By working with RFgen for both your hardware and software needs, you are guaranteed a holistic, comprehensive approach to your entire data collection solution.

Professional consulting help for a smooth implementation

The RFgen Professional Services team is here to help you customize and implement your new RFgen system. Our expertise covers data collection technologies, popular ERP systems, and supply chain automation best practices—a trifecta of skills necessary for the successful planning, development and deployment of your data collection solution.

Education to help you maximize your investment

RFgen offers a variety of training delivery options including classroom and e-learning options. Training is conducted by the same professional services consultants and ERP experts that design and develop solutions for our customers.
