YOU NEED
TO SUCCEED

RFgen Software Training Services

"RFgen training was very good. It was very productive. RFgen was very easy and very quick to learn. We did all of the development and implementation in just one month."

~Joel Sena | JBT Corporation

GET THE RFGEN TRAINING YOU NEED FOR FAST MOBILE DEPLOYMENT

RFgen Software is a feature-rich development platform that allows you to create custom, tailored mobile applications that integrate with your enterprise systems. In order to maximize the investment in your mobile data collection solution, your IT team needs the knowledge and skills required to effectively utilize, deploy and manage your RFgen solution.

RFgen Software Training Services are the best way to empower your IT team to own the development and deployment of your mobile data collection solution. After attending training, they will be able to:

- Manage the operations and users of your RFgen data collection solution.
- Quickly modify and develop mobile applications and deploy them with less errors and faster rollouts.
- Effectively plan future expansions into other areas of the supply chain.

By mastering the RFgen architecture and development environment, your IT staff will create the best end-user experience for your mobile workers, maximizing their productivity and accelerating the ramp up of new users.

THREE TRAINING FORMATS TO SUIT YOUR LEARNING STYLE, SCHEDULE AND BUDGET

Option 1: Classroom Training

For the most impactful learning experience, we recommend live classroom training. Hosted at an RFgen office, this highly interactive training is led by an RFgen expert and includes plenty of hands-on exercises to help you master concepts and pick up insider shortcuts.

Option 2: On-Site Training

Take your live training to the next level by bringing an RFgen expert to your site. By hosting the class at your office, the focus is entirely on you. The schedule and agenda can be customized to meet your specific requirements and you eliminate the need for "train the trainer" by having everyone attend that will be working with the RFgen mobile solution.

Option 3: e-Learning

e-Learning combines the benefits of a live RFgen expert with the convenience and affordability of online education. Content is broken down into modules that may be spread out over multiple days depending on your needs; the full suite of modules takes 6-8 hours to deliver, depending on Q&A. The e-Learning curriculum covers most of the same material as the classroom training, but offers less interaction and hands-on exercises due to the limitations of the format.

RFGEN TRAINING CURRICULUM

The classroom training lasts two days, with an optional third day to cover your ERP application suite or any custom applications delivered by our Professional Services team. The e-Learning follows a different format and schedule.

Day 1: RFgen Introduction—System Concepts, Functionality and Product Components

- Understanding RFgen
- Installation and configuration
- RFgen components: Mobile Development Studio, Mobile Application Server, Windows Desktop Clients, and Mobile Clients
- The RFgen master database
- Configuration and deployment of thin and mobile clients
- RFgen mobile apps management
- Controlling development using the master database concepts
- Voice concepts

Need Training in a Local Language?

As an additional service, RFgen training can be customized and delivered in a local language. Contact us for more details.

Day 2: Managing the RFgen Server and Developing Mobile Applications

- RFgen version migration
- Understanding the development environment
- Design a database-linked application in RFgen
- Understanding variables and scope
- SQL validations
- Lists and data retrieval
- Creating procedures in RFgen
- Creating mobile app macros in RFgen

Day 3: Optional ERP Focus

This optional third day is taught by one of our ERP consultants who will help you understand the integration between RFgen and your specific ERP, the application suite that came with your purchase, and any custom mobile applications provided by our Professional Services team.

LEARN MORE

RFgen classroom training is scheduled monthly. To get pricing and to schedule your training courses, contact us today at 888-426-2286. For more information, visit our website at www.RFgen.com.
