

A WMS-LITE SOLUTION FOR  
DIRECTED PICKING, PUTAWAY  
AND REPLENISHMENT

The RFgen Warehouse Director Solution

**RFgen**

REDUCE COST | MAXIMIZE PRODUCTIVITY | IMPROVE ACCURACY | INCREASE EFFICIENCY

## RFGEN WAREHOUSE DIRECTOR — WMS BENEFITS AT A FRACTION OF THE COST

In today's go-go-go business environment, you don't have time to struggle through paper-based warehouse operations. If you've been asked to cut costs, accelerate throughput, and increase accuracy—without more workers—you need the RFgen Warehouse Director Solution. From receiving and putaway, to picking and replenishment, this "lite" warehouse management system (WMS) solves real-world challenges, without the complexity and expense typically associated with an enterprise WMS.

### DIRECT MOVEMENT OF MATERIALS

Direct the movement of materials throughout your warehouse using the inventory data in your ERP system.

### INCREASE THROUGHPUT, NOT HEADCOUNT

Gain greater visibility into inventory levels, so your warehouse can run leaner and you can fill orders more quickly.

### EMPOWER YOUR WAREHOUSE MANAGER

Managers can track the progress of jobs, monitor worker productivity, anticipate and avoid resource shortages and set inventory thresholds.

*"From the time we installed RFgen nine years ago until today, we've nearly tripled the volume of transactions, but the support required has not really changed."*

## DIRECTED PICKING

If your team still picks against a paper pick list, they may take a lot of extra walks around your warehouse and have difficulty enforcing first-in, first-out (FIFO) rules. Lack of automation also creates a higher risk of picking the wrong products. RFgen Warehouse Director evaluates the best possible picking route by analyzing on-hand inventory, FIFO rules, and warehouse location utilization. It delivers the automation needed to:

- Save time with guided picking for less crisscross and back-tracking in the warehouse.
- Automatically split requests to multiple locations to fulfill an order—for example splitting between whole pallets and additional units required from picking bins.

## DIRECTED PUTAWAY

RFgen Warehouse Director can optimize inbound receiving and make putaway suggestions based on prior inventory usage. It will optimize your warehouse operations by helping your team:

- Ensure fast-selling items get placed in preferred locations—for example at the end of aisles or nearest the shipping dock.
- Send inventory to special locations based on its attributes—for example routing frozen items to a freezer or intact pallets to box storage.

## DIRECTED REPLENISHMENT

RFgen Warehouse Director helps warehouse managers become more proactive about inventory replenishment by keeping an eye on real-time inventory levels in each location. With updates to and from your ERP, it can help you:

- Replenish inventory from storage locations before items stock out and cause fulfillment delays.
- Help the purchasing department stay ahead of demands with real-time inventory levels.

## GET A FUTURE-READY WAREHOUSE TODAY

The RFgen Warehouse Director Solution deploys rapidly. You can have it running in your warehouse within a few weeks.

## SUPPORTED TECHNOLOGIES

### Data Collection

- Android Devices
- Barcode Scanners
- Carousels and Scales
- iOS Devices
- RFID
- Tablets and Smartphones
- Telnet
- Vehicle Mount Computers
- Voice Recognition
- Windows Mobile and CE

### Enterprise Integrations

- SAP
- SAP Business One
- Oracle's JD Edwards
- Oracle E-Business Suite
- Deltek Costpoint

### General Connectivity

- COM Interop
- Databases
- IBM AS/400
- IBM Mainframes
- NET Assemblies
- UNIX Systems
- Web Services

## RFGEN SOFTWARE—YOUR TOTAL SOLUTION PROVIDER

RFgen Software helps organizations reduce supply chain implementation costs and increase accuracy and efficiency with the industry's most reliable, flexible mobile data collection and barcode software solutions. In business since 1983, RFgen is known in the supply chain industry for its solid, high-quality products and high customer satisfaction ratings. With a global reach and local touch, RFgen and its global network of certified solution partners can support your organization anywhere in the world. Not only does RFgen provide robust mobile supply chain software, we also offer a complete end-to-end mobile data collection solution, including:

### Mobile device hardware for your data collection needs

As your one-stop-shop, RFgen can provide you with the mobile device hardware you need to automate your warehouse. RFgen is a certified reseller of mobile computing devices for all major hardware brands. By working with RFgen for both your hardware and software needs, you are guaranteed a holistic, comprehensive approach to your entire data collection solution.

### Professional consulting help for a smooth implementation

The RFgen Professional Services team is here to help you customize and implement your new RFgen system. Our expertise covers data collection technologies, popular ERP systems, and supply chain automation best practices—a trifecta of skills necessary for the successful planning, development and deployment of your data collection solution.

### Education to help you maximize your investment

RFgen offers a variety of training delivery options including classroom and e-learning options. Training is conducted by the same professional services consultants and supply chain experts that design and develop solutions for our customers.
