MOBILE DATA COLLECTION AND SECURE DATA EXCHANGE ACROSS APPLICATIONS

RFgen Web Services Solutions

RFgen solutions using Web Services facilitate the exchange of enterprise data by multiple, cross-platform applications. Securely exchange operational and supply chain data using mobile devices equipped with RFgen. Web Services open up the possibility of making disparate systems communicate and provide organizations the ability to tie different systems together.

Using open protocols and interfaces, RFgen Web Services remove much of the complexity associated with the exchange of data between applications running on different devices and using different operating systems. RFgen supports several web service protocols such as:

- XML to perform calls to your web services and exchange data.
- SOAP to access remote objects properties and methods.
- DOM to easily format your XML data structures.

AUTOMATE AND MOBILIZE ENTERPRISE DATA COLLECTION

RFgen helps businesses automate the collection of data across the supply chain by mobilizing data collection with barcode scanners, tablets, handheld devices, or voice headsets. Working faster and more accurately, RFgen helps employees gain productivity throughout the enterprise. Companies become more operationally efficient on receiving and shipping docks, in the warehouse, and on the manufacturing floor. RFgen's enterprise mobility software deploys rapidly, is considerably less expensive to maintain than other systems, is easy to learn and use and delivers proven ROI while solving important business challenges.

SECURELY CONNECT DATA IN THE CLOUD WITH YOUR ERP

RFgen Web Services enable you to collect data using mobile devices and transmit it securely through web services to update your ERP server. Connecting through a pre-defined web service, RFgen applications can issue self-contained data requests that encapsulate security, authentication, failure conditions, networking details, and more.

SUPPORTED TECHNOLOGIES

RFgen

RFGEN SOFTWARE—YOUR TOTAL SOLUTION PROVIDER

RFgen Software helps organizations reduce supply chain implementation costs and increase accuracy and efficiency with the industry's most reliable, flexible mobile data collection and barcode software solutions. In business since 1983, RFgen is known in the supply chain industry for its solid, high-quality products and high customer satisfaction ratings. With a global reach and local touch, RFgen and its global network of certified solution partners can support your organization anywhere in the world. Not only does RFgen provide robust mobile supply chain software, we also offer a complete end-to-end mobile data collection solution, including:

Mobile device hardware for your data collection needs
As your one-stop-shop, RFgen can provide you with the mobile device hardware you need to automate your warehouse. RFgen is a certified reseller of mobile computing devices for all major hardware brands. By working with RFgen for both your hardware and software needs, you are guaranteed a holistic, comprehensive approach to your entire data collection solution.

Professional consulting help for a smooth implementation
The RFgen Professional Services team is here to help you customize and implement your new RFgen system. Our expertise covers data collection technologies, popular ERP systems, and supply chain automation best practices—a trifecta of skills necessary for the successful planning, development and deployment of your data collection solution.

Education to help you maximize your investment
RFgen offers a variety of training delivery options including classroom and e-learning options. Training is conducted by the same professional services consultants and supply chain experts that design and develop solutions for our customers.
